

# Unique Situations - Unique Solutions

## Platform System™

### Roll-A-Ramp RV Platform System™

The Roll-A-Ramp Platform System™ is a perfect solution for situations where access is needed to homes, RV's, cottages, anywhere a platform would help to get access. After all, isn't freedom what we are all after?

Roll-A-Ramp® has developed this attractive and very sturdy system to go along with our superior quality ramps. The System is totally custom for each individual's circumstance.

Whether you stay long term or are on the move, the Roll-A-Ramp RV Platform System™ is the solution to your access problems. Constructed from sturdy maintenance-free aluminum and furniture-grade aluminum re-enforced handrails. UV resistant and corrosion proof. Made for years of outdoor use.

Ideal for situations where the ground surface is unlevel. Each leg may be independently adjusted. Ramps are also custom depending on length needed for your height. We build your Roll-A-Ramp® to ANY length. Regain your freedom with our ramp systems.

*"Freedom Regained Through Accessibility"*

A special feature to the Roll-A-Ramp® is the ability to easily separate them into various sections with the use of our exclusive Positive Lock Pins™. Simply remove the pins and roll up to make your ramp into an even lighter, more manageable ramp.

Very simple setup and take down. Ramp quickly lifts out of securing brackets, and handrails & platform legs are both easily removed for easy and efficient storage. You are on your way in minutes not hours!

Platform systems are all custom for your situation. Custom height for each situation plus a 3" adjustment range for height.

## Handrails

Handrails are constructed from the highest quality furniture-grade PVC, and are aluminum re-enforced. Your security is ensured with the Roll-A-Ramp® Handrail System. Easily assembled and simple to remove in the case of transport or storage.

*As seen in Buckingham Palace.*  
Handrail system was installed for Her Majesty the Queen for a Paralympics celebration held at Buckingham Palace in London.

Handrails are custom made to any length. We've had systems of over 40 feet in length. You can get handrails for either one or both sides.
